

Energy Works Training Application

Welcome to Energy Works, a free program designed to provide you with the training necessary to secure a fulfilling career in the green energy sector. This industry is full of employers seeking individuals just like you to join their teams that are inspired to fight climate change through careers in heat pump installation and weatherization.

This program happens in 3 steps:

1. Complete Application Process
2. Attend Energy Works Training
3. Begin the Employment Journey with Customized Support

The answers to the questions in this application do not qualify or disqualify you from taking our training, they simply help us get to know and support you the best we can!

GREEN ENERGY CAREERS OVERVIEW

Weatherization: The process of protecting a home's interior from outside elements. Weatherization is about keeping the heat inside during the winter and outside during the summer. Learn how to blow insulation, practice air sealing doors, gain experience with basic power tools, and more during our hands-on training while also receiving your First Aid/CPR/AED and OSHA 10 certifications

Heat Pump Installation: A heat pump is part of a home heating and cooling system with parts installed inside and outside your home. Heat pumps are powered by electricity and are designed to provide energy efficient comfort via heat and air conditioning all year round. Learn how to safely install indoor and outdoor units and have the opportunity to receive certifications in First Aid/CPR/AED, OSHA 10, and EPA 608 through our training.
